ORGANIC NITROGEN FERTILIZER

Fluid extract of yeast containing brown seaweeds
Allowed in organic agriculture.

Composition

Organic Nitrogen (N)	1%
Biological organic carbon (C)	10%
Organic matter with nominal molecular weight < 50 kDa	30%

Chemical and physical features

pH	5
Density	1,25 g/cm ³

Characteristics

Protev is a 100% water-soluble organic nitrogen fertilizer **containing brown seaweeds (Sargassum and Laminaria)**. Thanks to its particular composition, **with a high and well-balanced content of vegetal extracts that can be rapidly absorbed**, it can enhance the production of proteins, enzymes, plant regulators and sugars. When applied regularly Protev is apt to achieve a homogeneous plant development, a yields improvement in terms of quality and quantity, as well as a longer shelf life. In case of stress conditions due to bacteria **it helps quickening the plant's vegetative regrowth**.

Dosage and instructions

CROPS	METHODS OF USE	DOSES (ml/l)
	3-4 applications: throughout the agricultural cycle, up to 15-20 days before harvesting	3 - 5
	1 application: post-germination	3 - 5

The dosage for foliar application is intended for a water volume of 1000 l/ha.
